---

### Registration Tips:

1. Make sure your computer is well-connected with the Internet.
2. We suggest you simply copy & paste the Registration information into the pop-up dialog.
3. Make sure both Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click **Buy Now** to finish the payment and get the license.
4. Please make sure the Registration Email and Registration key you entered are complete, and do not insert any blank before or after them. Otherwise, an error message will pop up.
5. You are not allowed to transfer the license code from one computer to another since each license key is uniquely made for one device.
6. Registration code cannot be transferred between different versions of the program, so switching the license code from a Windows to a Mac computer is not permitted. Additionally, it cannot be shared between multiple programs either.

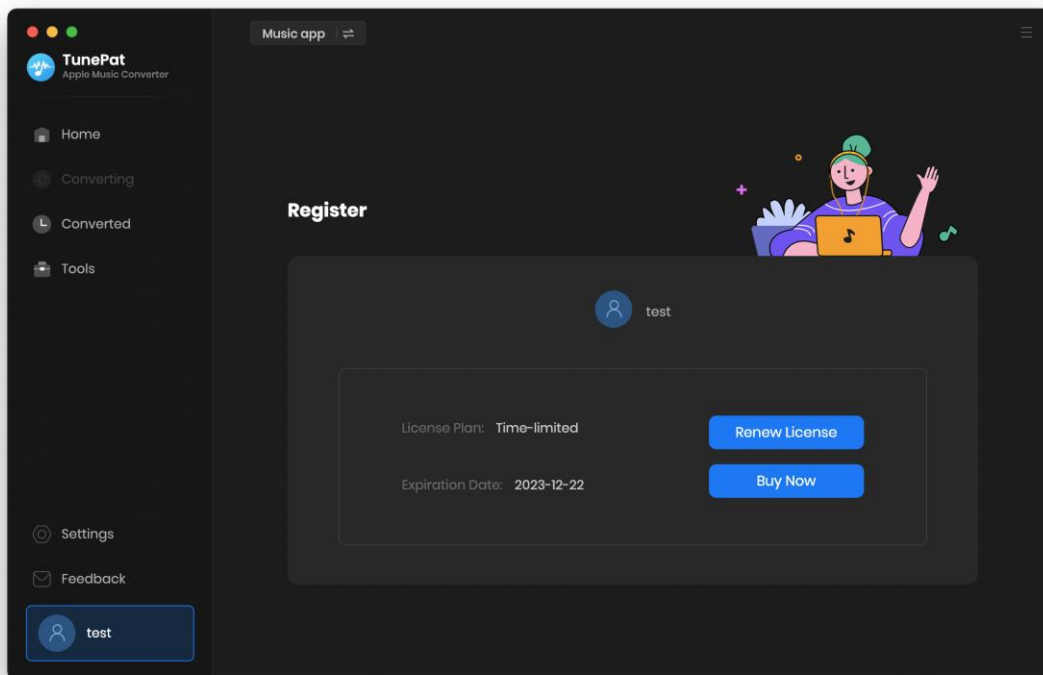

### Renew TunePat Apple Music Converter License

We provide auto-renewal service to both our monthly and yearly subscribers. You don't need to do anything to renew your license because you will get a new license key in your email every month/year. However, you need to register the license key manually.

When you click the blue box in TunePat's lower left corner, a window will popup for you to renew your TunePat license. To finish the license renewal procedure, click **Renew License**, enter your email address and your new license code, and then select **Confirm**.

"You have successfully registered with the program. Thank you for your support!" will appear in this page.

If you wish to stop your subscription for any reason, please contact us to cancel the auto-renewal before the subscription expires. Easy to do so. All you have to do is click **Menu** and select **Contact us**.

## Installation & Interface

- [Menu](#)

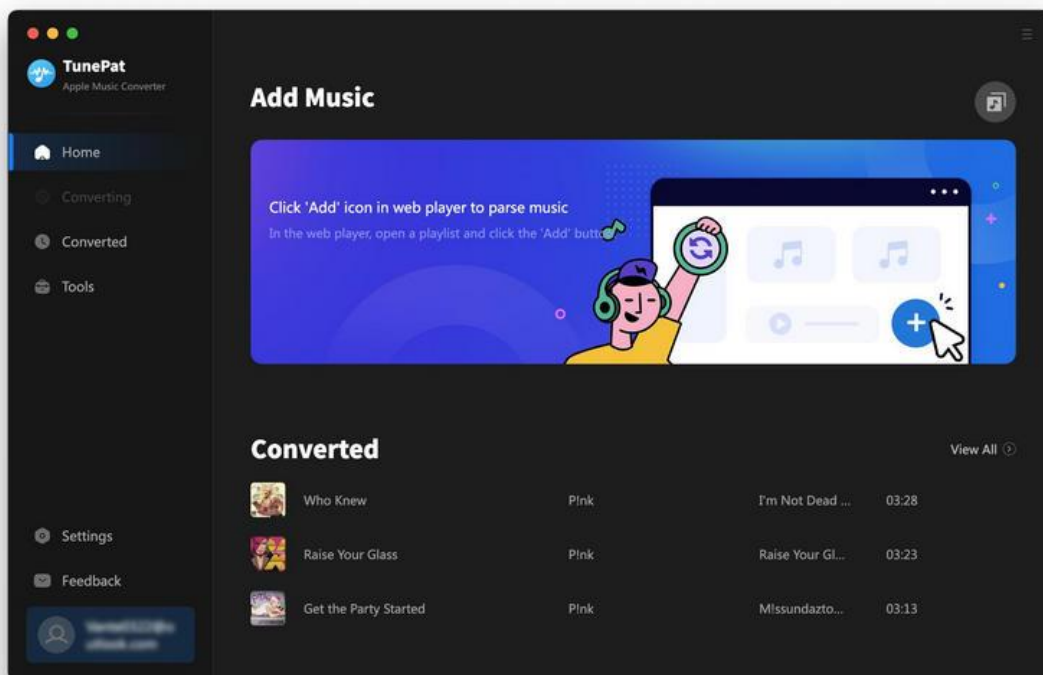

### Installation

To install this product, please refer to the following steps:

1. Download the latest version of TunePat Apple Music Converter through [Download Center](#).
2. Double click the .dmg file to start installing the program on your Mac. Then simply drag the TunePat application's icon to your Applications folder.
3. After installing, launch the program from the Launch Pad.

### Main Interface

After launching TunePat Apple Music Converter, you will see the main interface like this:

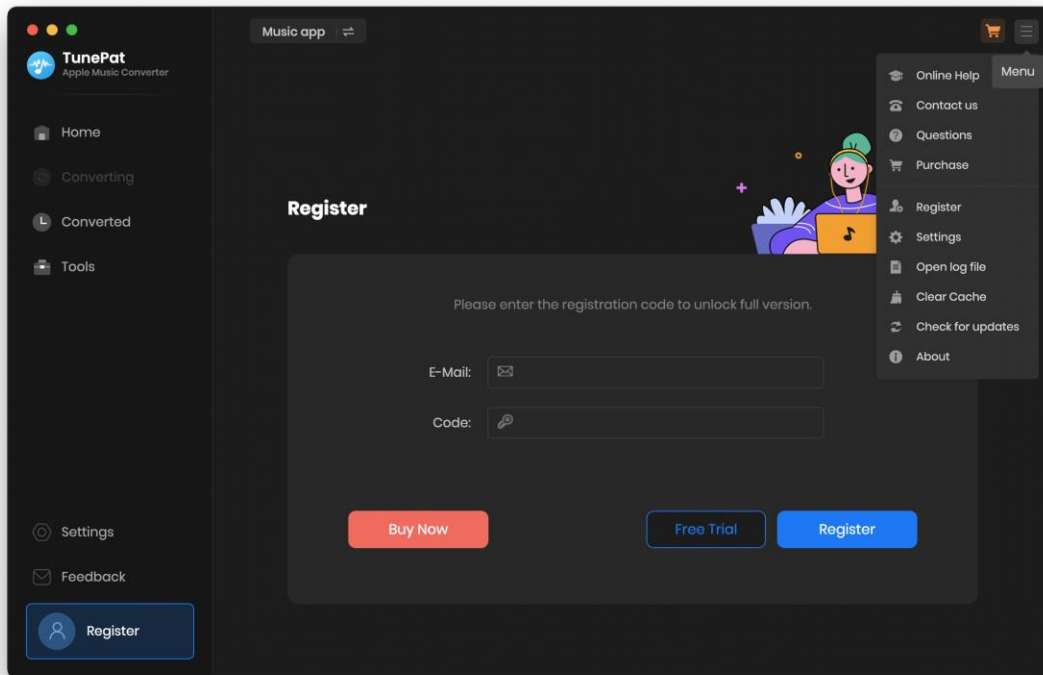

# Tutorial of TunePat Apple Music Converter for Mac

## Menu

After clicking the Menu button that shows like  on the upper right corner of the interface, you'll see the drop-down list as the following picture. In the menu list, you can get online help, open the settings window, find the log files quickly, check if there is an update on this program, and more.

## Tutorials

- [Record from Apple Music Web Player](#)
- [Record from Apple Music App](#)
- [Choose Convert Settings](#)
- [Convert Apple Music to Mac](#)
- [Check Conversion History](#)
- [Tools](#)
- [Feedback](#)

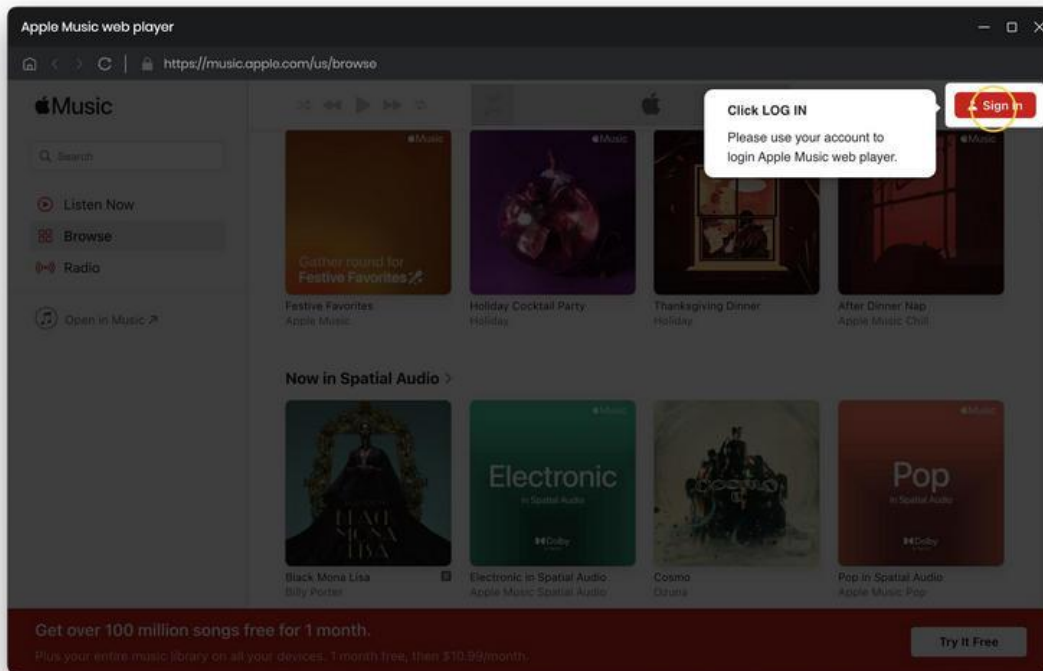

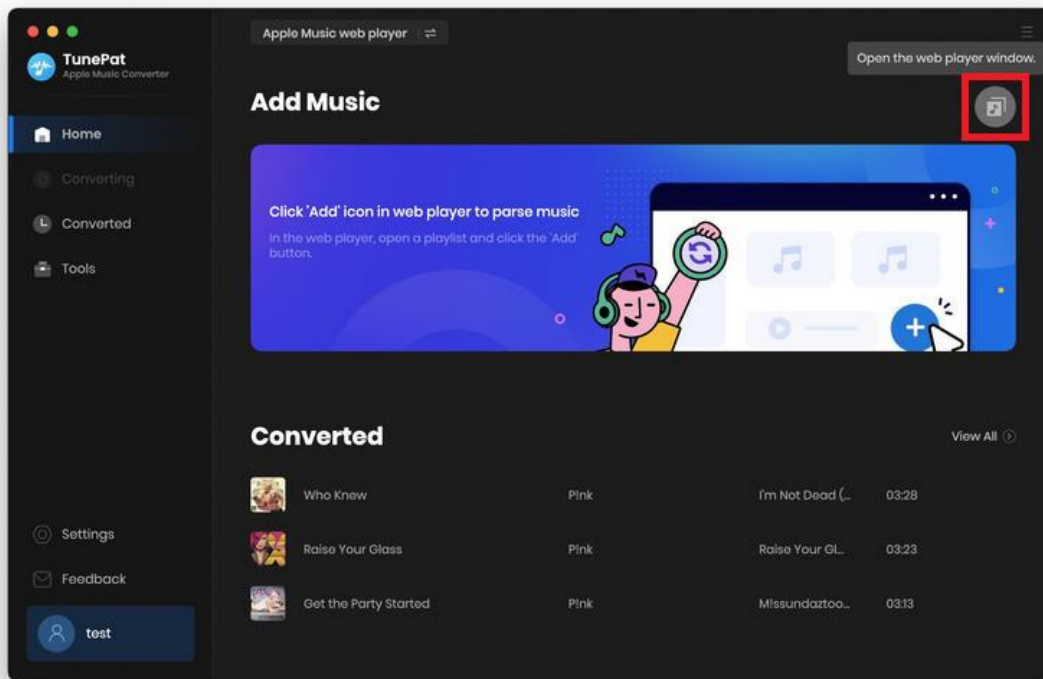

There are two audio source available for you to choose. Using the App, you can download Apple Music in **lossless** sound quality at a fast conversion speed. Using the web player, it is simpler to convert Apple tracks in the **original** sound quality because you may download them at **10x** speed **without having iTunes installed**.

### Record from Apple Music Web Player

Normally, when you open TunePat, you activate the web player option by default and the web page will automatically pop up. If not, please go to the interface of TunePat Apple Music Converter and click "**Open the webplayer window**" to activate it. Then, sign in with your Apple ID in the Apple Music web page.

## Tutorial of TunePat Apple Music Converter for Mac

Choose a playlist, artist, or album and open it, the **"Click to add"** button on the bottom right corner will turn to blue, please click it to add the music to convert.

You will see a pop-up dialog which display the songs that you can convert. Just select the songs you want to convert by clicking the **"Add"** button.

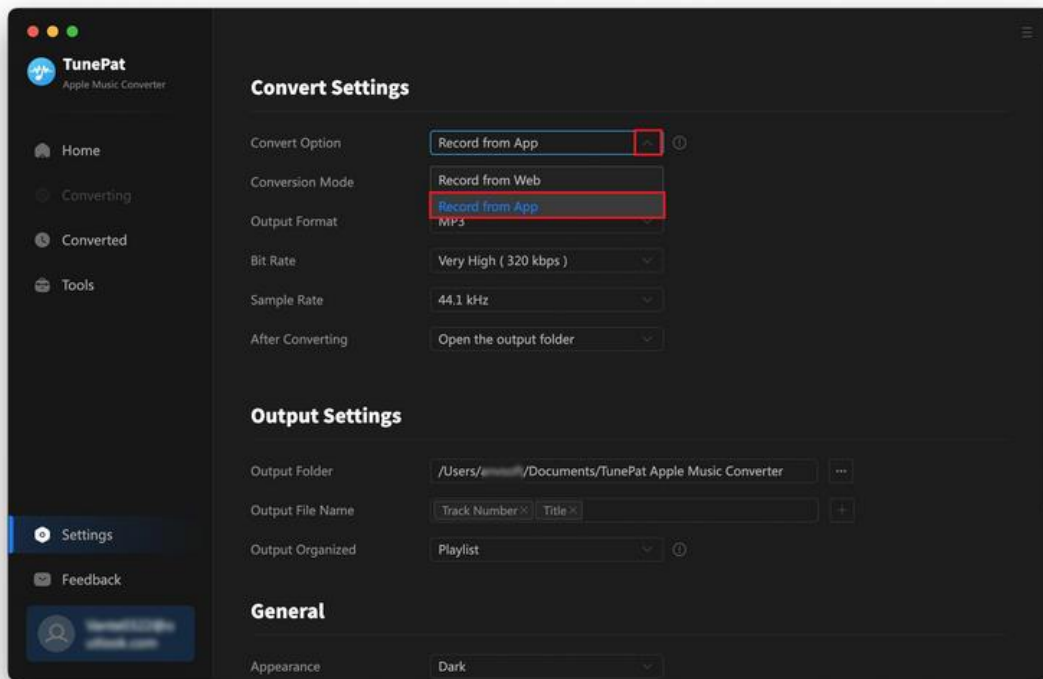

## Record from Apple Music App

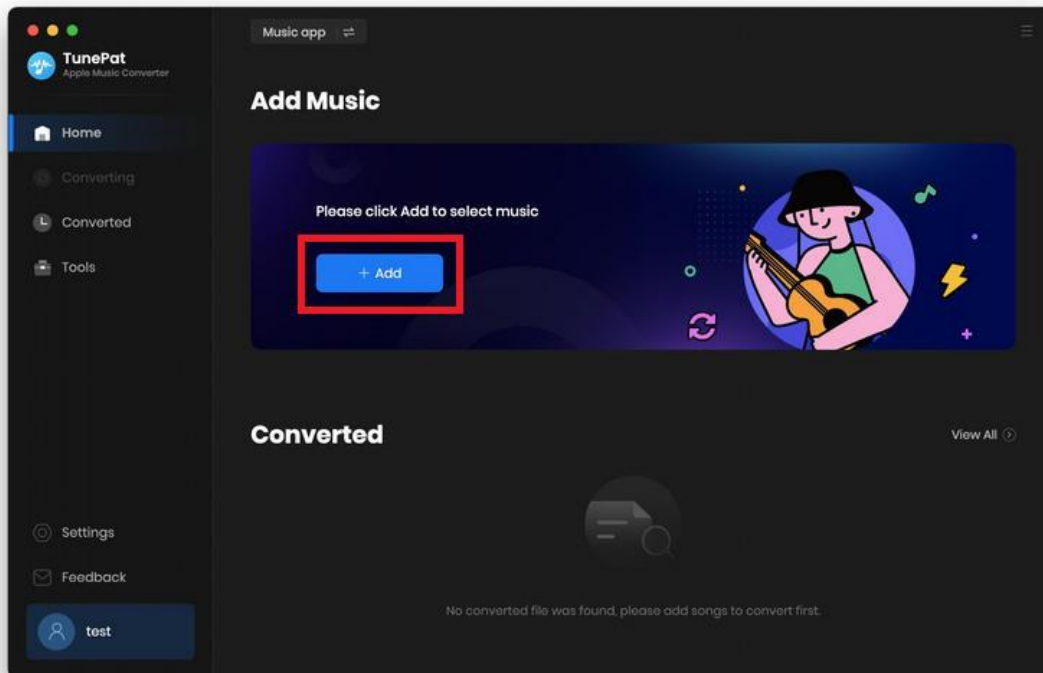

Please make sure the iTunes App is downloaded on your PC before you choose this option. Go to the **Settings**, and you can select the **Record from App** option under **Convert Option**. The iTunes App will be activated simultaneously when you activate this mode.

## Tutorial of TunePat Apple Music Converter for Mac

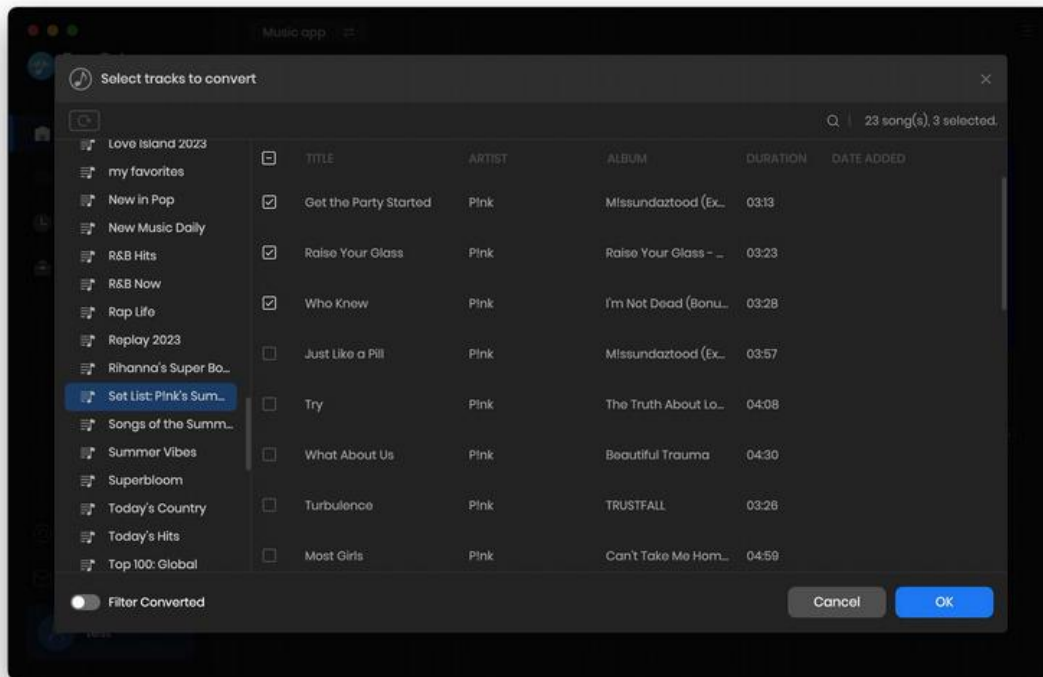

Select "+ Add" on TunePat and you can find the Apple songs you want to convert in your library.

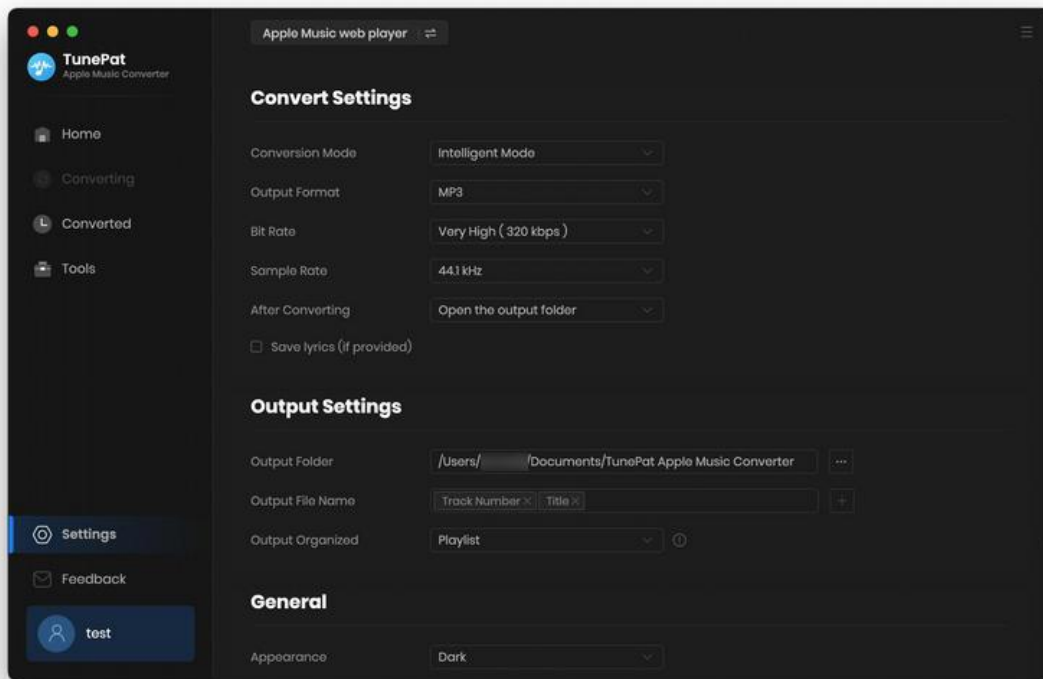

## Tutorial of TunePat Apple Music Converter for Mac

To add them to TunePat, just select the preferred tracks and touch the "OK" button. You may drag and drop Apple Music tracks, podcasts, iTunes M4P music files, and audiobooks directly into TunePat from your PC too.

### Complete Convert Settings

Click the "Settings" button  on the lower left. Here you can choose conversion mode (Intelligent Mode, Web Download, YouTube Download), output format (MP3, AAC, WAV, FLAC, AIFF, ALAC), bit rate (320 kbps, 256kbps, 192kbps, 128kbps), sample rate and output folder. The Output Organized function can help you manage the output files by Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, and Playlist/Album. In addition, you can set the name of the output folder as your need. Appearance and languages can also be changed in this module.

If you are using the **App** mode, you can keep a **lossless** sound quality that up to **3730kbps** by selecting **Auto** or the **ALAC** format in **Output Format**. To make music files playable on most devices, here we select **MP3** as the output format.

## Convert Apple Music to Mac

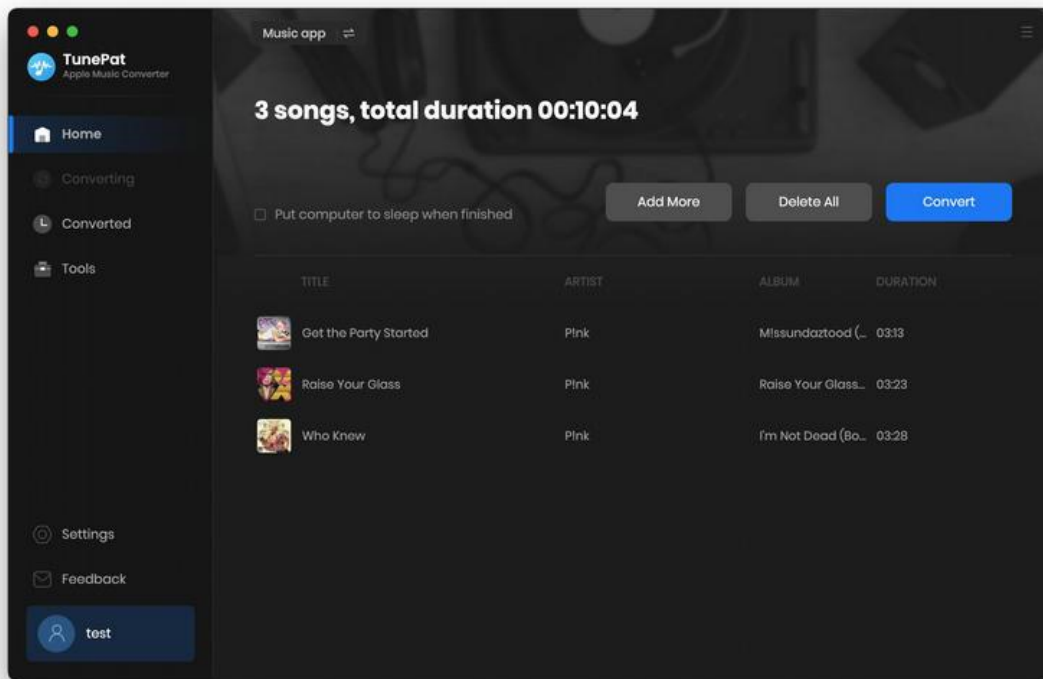

Click on the **"Convert"** button to begin the conversion, or if you would like convert songs from different albums, playlists or artists, you can click the **"Add More"** button again.

Then repeat the previous steps below. When finished adding all songs you want into the Convert list, tap on the **"Convert"** button.

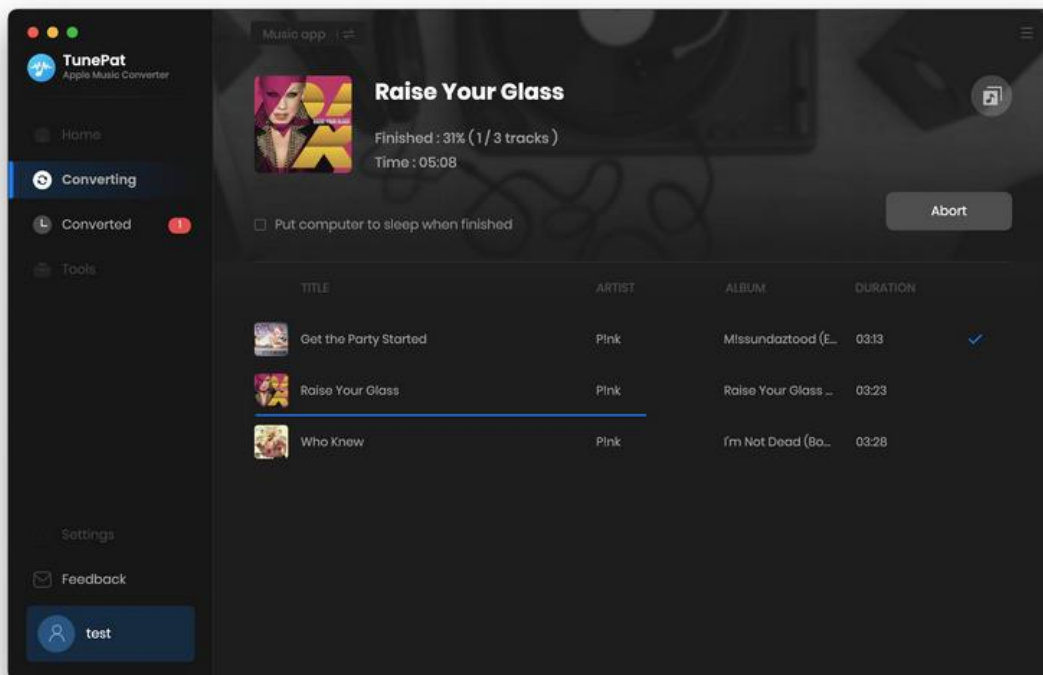

## Tutorial of TunePat Apple Music Converter for Mac

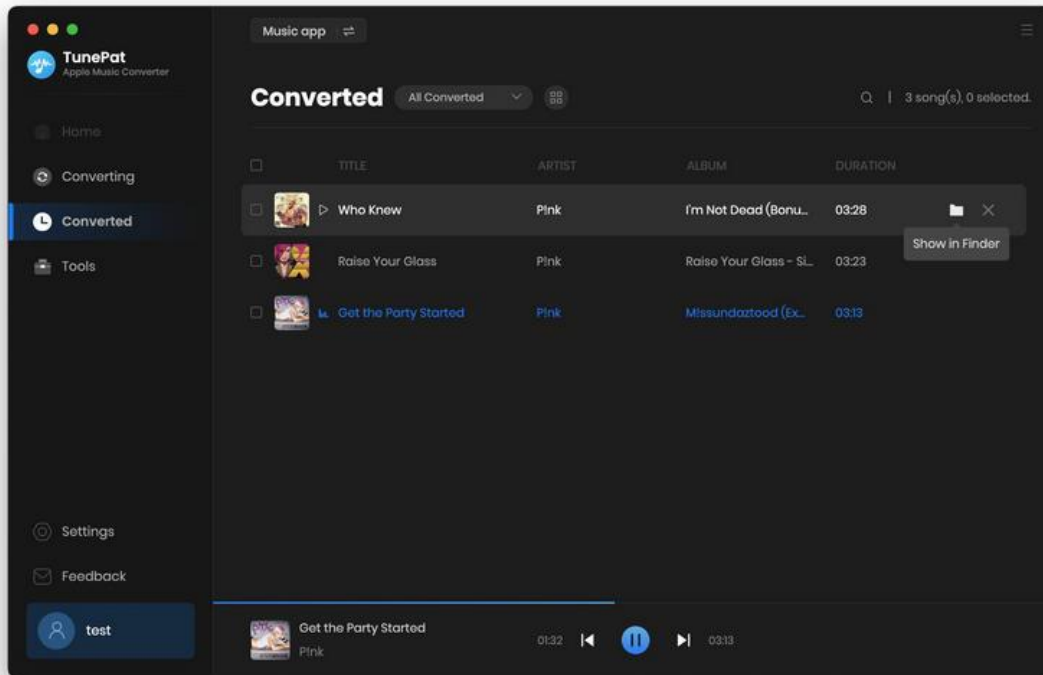

Just wait till complete, TunePat Apple Music Converter will save the selected songs to the local folder that you set up before.

## Check Conversion History

When the conversion is done, you can find the converted audio files by clicking the **"Converted"** button and click **"Show in Finder"** to locate your downloaded music files.

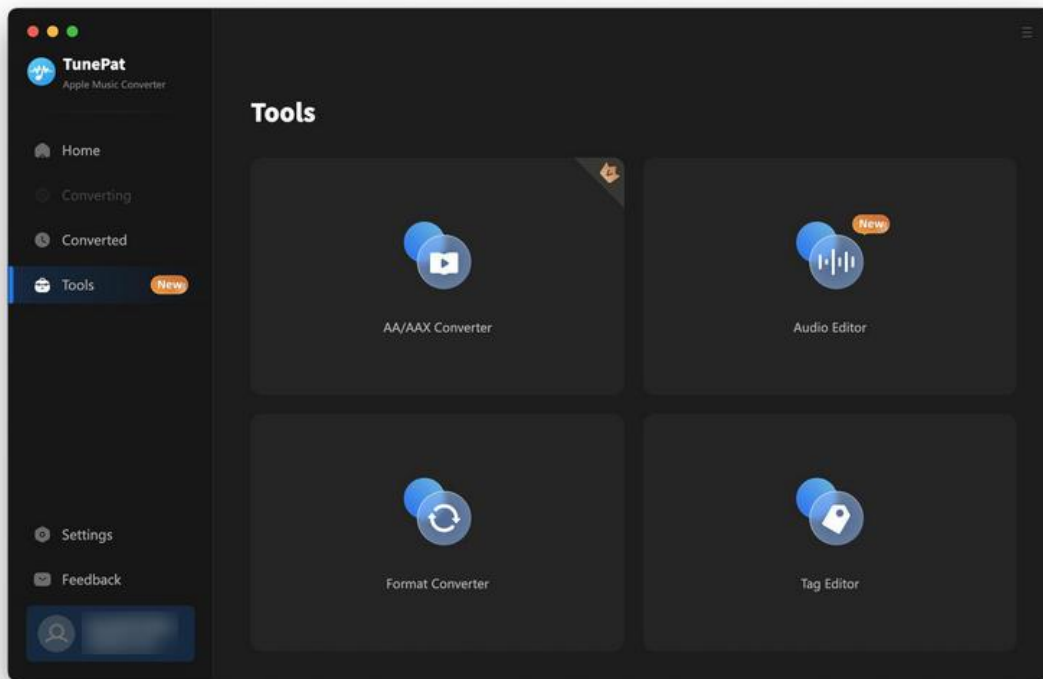

## Tools

TunePat Apple Music Converter not only converts Apple Music to standard formats, but also provides handy tools that users can employ to fulfill their own needs. The **Tools** module is accessible via the left toolbar including four options: **AA/AAX Converter**, **Audio Editor**, **Format Converter** and **Tag Edit**.

## Tutorial of TunePat Apple Music Converter for Mac

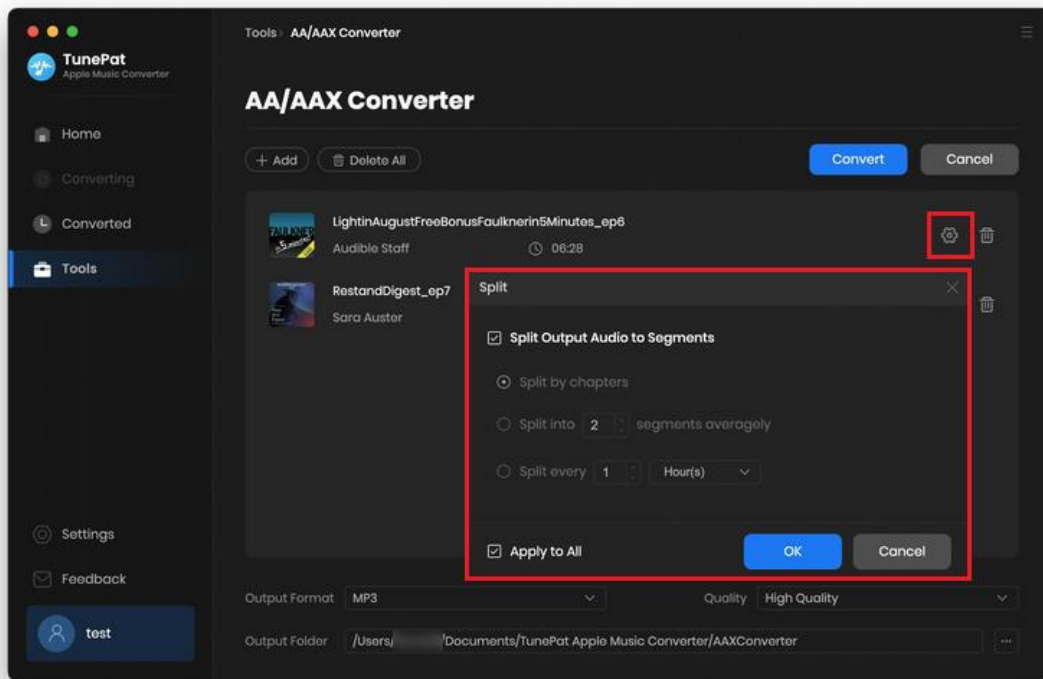

---

The purpose of the **AA/AAX Converter** is to assist users in converting their local AA/AAX audiobooks into audio formats that are compatible with a wide range of players. It's worth mentioning that this tool is only accessible to registered users. By clicking on the **gear icon** next to the audiobook title, users can access advanced settings, including the automatic splitting of audiobooks based on chapters or equal-sized segments. Additionally, TunePat provides the convenient **Apply to all** option, allowing users to apply the selected settings to all files simultaneously.

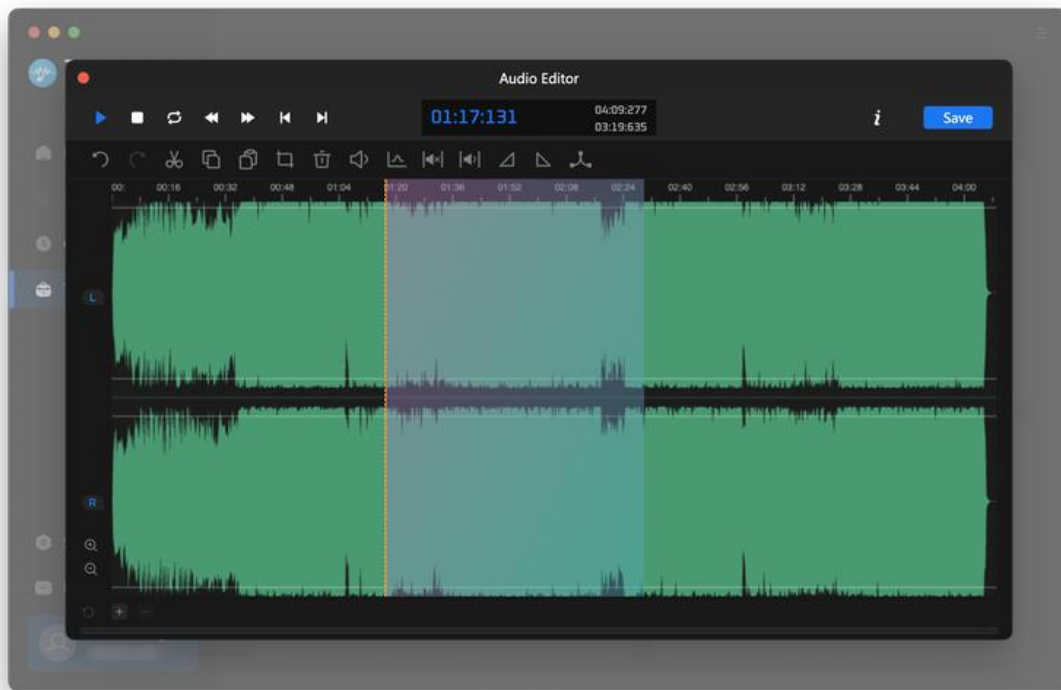

## Tutorial of TunePat Apple Music Converter for Mac

The **Audio Editor** enables users to effortlessly customize and modify their audio files. With features such as trimming, merging, adjusting speed and volume, and adding effects like fade in and fade out, it offers a smooth process for enhancing your music library. Additionally, there are more features available for exploration.

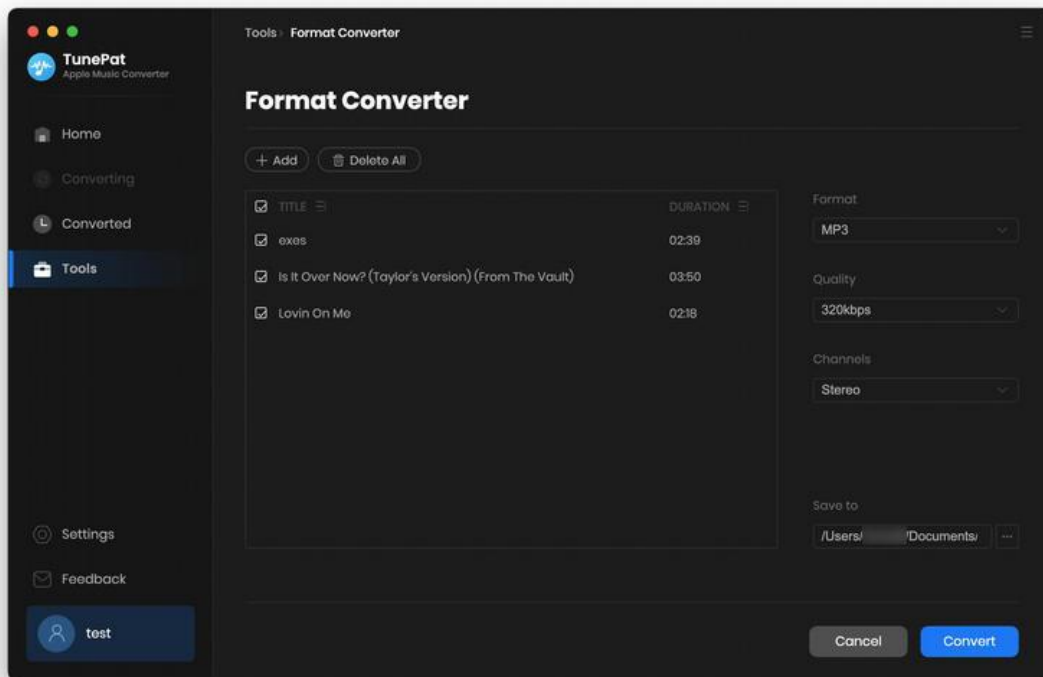

Simply drag the audio file to TunePat or use the "**Open**" button to select the desired editing function, such as trimming, inserting silence, adjusting volume, or adding effects. Once satisfied, click "**Save**" to specify the output file name, format, bit rate, and output path to store the edited audio file in your chosen location.

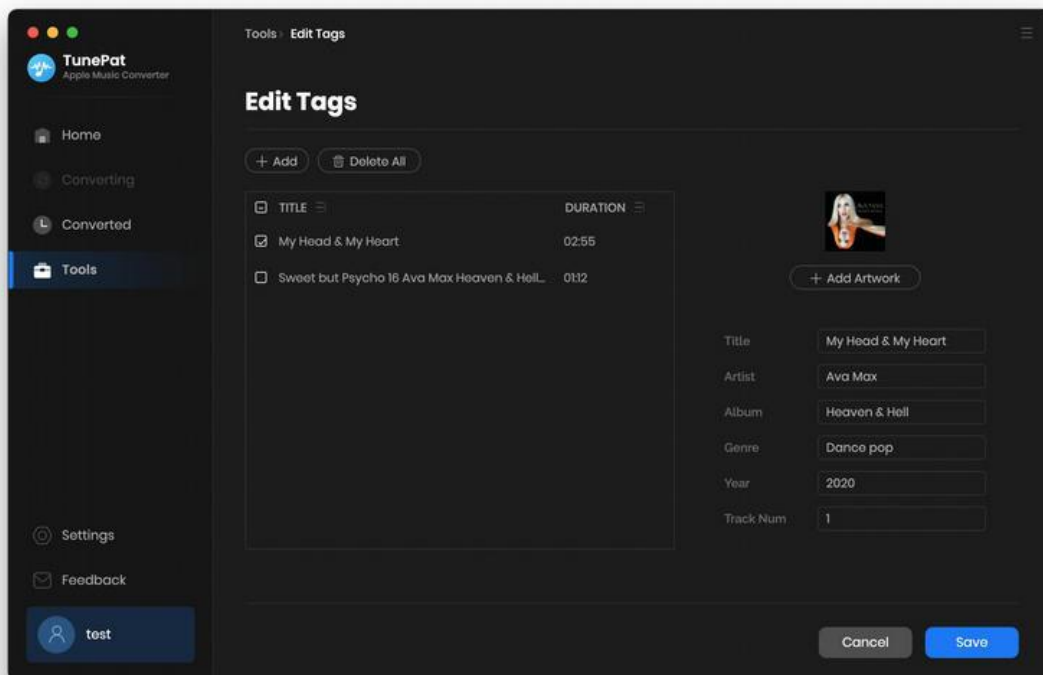

**Format Converter** is a tool that converts audio formats. To begin with, click the "+ Add" button to select a local audio file from your PC. Then, click "Convert" to convert it to your desired format. Output audio formats now supported include MP3, M4A, FLAC, WAV, OGG, and AIFF. In "Channels", you can additionally choose between "Mono" and "Stereo" audio.

## Tutorial of TunePat Apple Music Converter for Mac

**Tag Edit** is used to edit the tags of converted music, which include the Title, Artist, Album, Genre, Year, and Track Number. After you've made these changes, simply click the "Save" button.
