Introduction

Thank you for using TunePat Spotify Converter for Windows!

[TunePat Spotify Converter for Windows](#) is a simple yet powerful Spotify downloader. It lets one download tracks, albums, playlists, and podcasts from the Spotify app or web player and saves them on a computer forever in MP3, AAC, WAV, AIFF, FLAC, or ALAC format at up to 10X conversion speed. Meanwhile, the original audio quality and the ID3 tags will be preserved perfectly after conversion.

With TunePat Spotify Converter, you can easily backup Spotify songs on your local computer, enjoy Spotify songs on various media players, transfer Spotify music from device to device, etc. This software is designed with almost all the features of a qualified, even excellent, Spotify converter.

Key Features

- Export music tracks, albums, playlists, podcasts, and lyrics from Spotify;
- Convert Spotify Music to MP3, AAC, WAV, AIFF, FLAC or ALAC;
- Keep ID3 tags after conversion;
- 10X conversion speed; Lossless output audio quality;

Tutorial of TunePat Spotify Converter for Windows

- Download Ad-free Spotify Music with a Free Spotify account;
- Handy tools: Format Converter, Burn CD, Tag Edit, etc.

System Requirements

- Windows 7, 8, 8.1, 10, 11;
- 1GHz processor or above;
- Monitor with 1024 x 768 pixels or higher resolution;
- 512 megabytes (MB) or higher of RAM;
- 1GB of available hard-disk space or higher.

Purchase TunePat Spotify Converter for Windows

Tip: To buy a license key for TunePat Spotify Converter for Windows, click [here](#).

1. Why should I buy TunePat Spotify Converter for Windows?

TunePat Spotify Converter for Windows is a shareware, and the trial version has limits that enable users to convert the first 1 minute for each file. After you purchase this product, you will receive your Registration Email and Registration key to unlock the trial version limitation.

2. What are the Benefits after Registration?

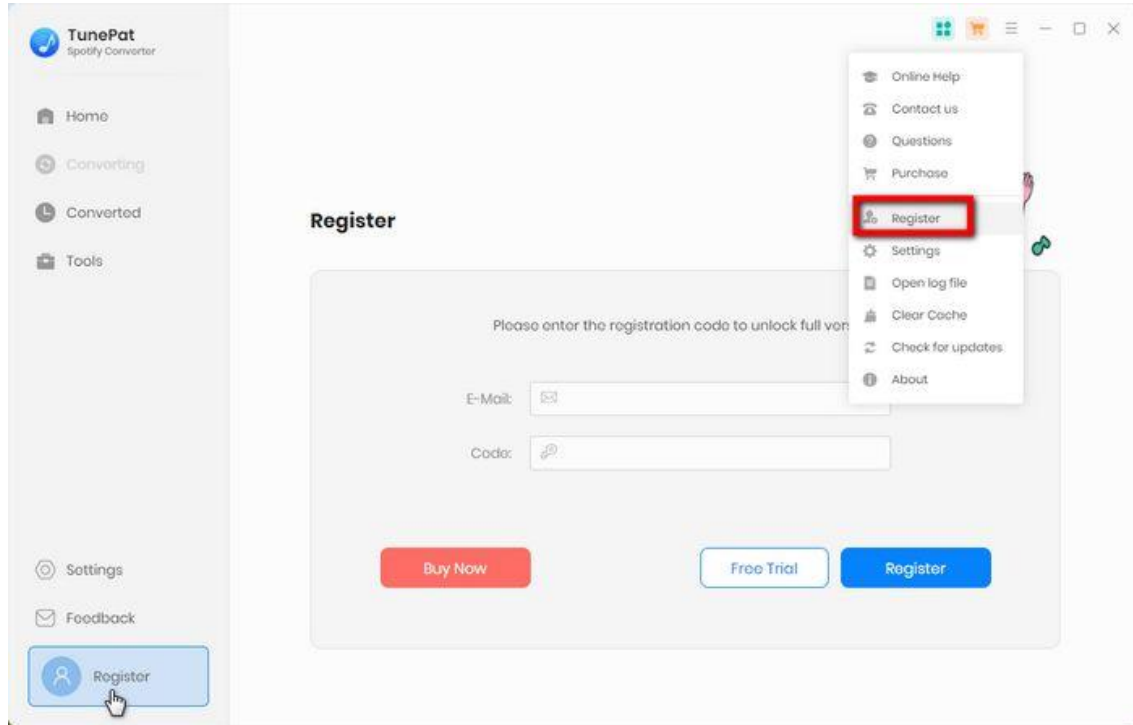

- You can get access to the full features of TunePat Spotify Converter.
- You can enjoy FREE upgrades to the latest versions of the same product.
- You can enjoy FREE technical supports.

Register Windows Version of TunePat Spotify Converter

Step 1: Click on the **Menu > Register** or the **Register** option on the toolbar in the lower left corner to open the registration window below and complete the registration process.

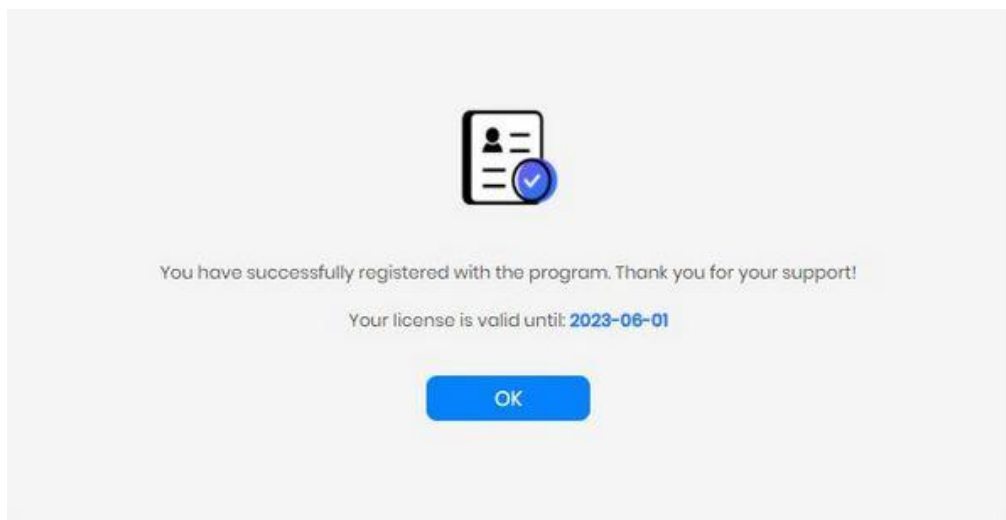

Tutorial of TunePat Spotify Converter for Windows

Step 2: Then copy and paste the registration Email and Code into the registration pop-up Window. Click on **Register** button.

Step 3: Once the registration process is done, there will be a pop-up dialogue saying “**You have successfully registered the program. Thank you for your support!**”, and it will also show you when your license will expire.

Tutorial of TunePat Spotify Converter for Windows

Registration Tips:

1. Make sure your computer is well-connected with the Internet.
2. We suggest you simply copy & paste the Registration information into the pop-up dialog.
3. Make sure both Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click **Buy Now** to finish the payment and get the license.
4. Please make sure the Registration Email and Registration key you entered are complete, and do not insert any blank before or after them. Otherwise, normal registration will not be possible.
5. A license key of TunePat can only be used by one computer device. If you need to replace the computer, please contact the TunePat customer service team by email to help you deal with it. If you register and use on multiple devices at the same time, the registration code will become invalid and you cannot register successfully.

Update TunePat Spotify Converter License for Subscribers

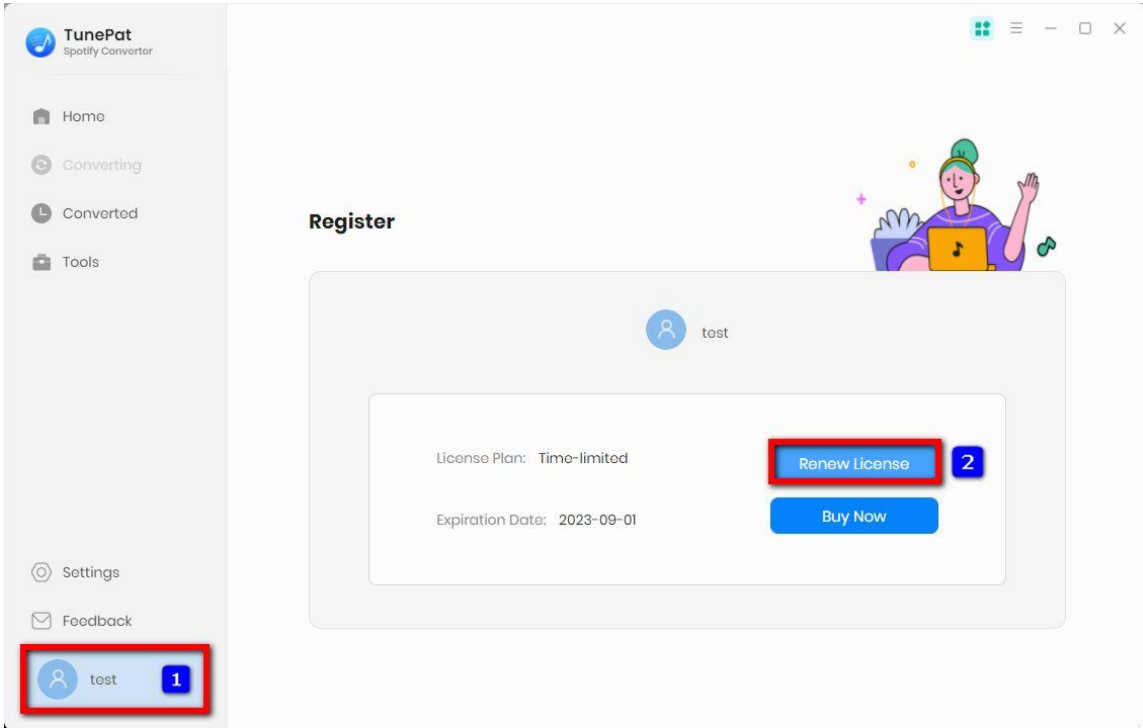

In addition to the lifetime license, TunePat also provides monthly and annual subscription licenses to meet the needs of different users.

Monthly and annual subscriptions are auto-renewal models. If you no longer need to use the license key, please contact our customer service team (support@tunepat.com) to help you deal with it before the next deduction date. If your order was auto-renewed, you will receive a new registration code by email. The license key in your program will not be updated automatically, please refer to the following steps to update your license status.

Click the light blue account button at the bottom left and select the **Renew License** option. Copy and paste the new code into it, and click **Confirm** to update.

Installation & Interface

- [Installation](#)
- [Main Interface](#)
- [Menu](#)

Installation

To install this product, please refer to the following steps:

1. Download the latest version of TunePat Spotify Converter through [Download Center](#).
2. Double click the tunepat-spotify-converter.exe file to accomplish a "single-click install".
3. After installing, you can double-click TunePat icon to launch the program.

Main Interface

After launching TunePat Spotify Converter for Windows, you will see that there are two entrances, which are two conversion modes. When you choose the **App conversion mode**, please make sure that the Spotify app has been installed on your computer. If you don't want to install, you can choose **Web player mode**, which allows you to grab your favorite Spotify songs directly from the embedded Spotify web player and convert them at ten times faster.

Tutorial of TunePat Spotify Converter for Windows

Menu

After clicking the **Menu** button  on the upper right corner of the interface, you'll see the drop-down list as the following picture. Here you can visit the FAQ center of TunePat, check for update when a new version is available, clear cache and relaunch the program, and etc.

Add Spotify Music to TunePat (App Mode)

Click the **Spotify (App)** button (download Spotify Music at **10X** speed), and the Spotify app will open simultaneously on your computer. Make sure you have already installed the Spotify app. Otherwise, you will receive a prompt like this:

Please ensure you have logged in to your Spotify Premium or Free account on the Spotify app on your computer. Then you can add the songs, playlists, albums, or podcasts you want to convert to TunePat from the app.

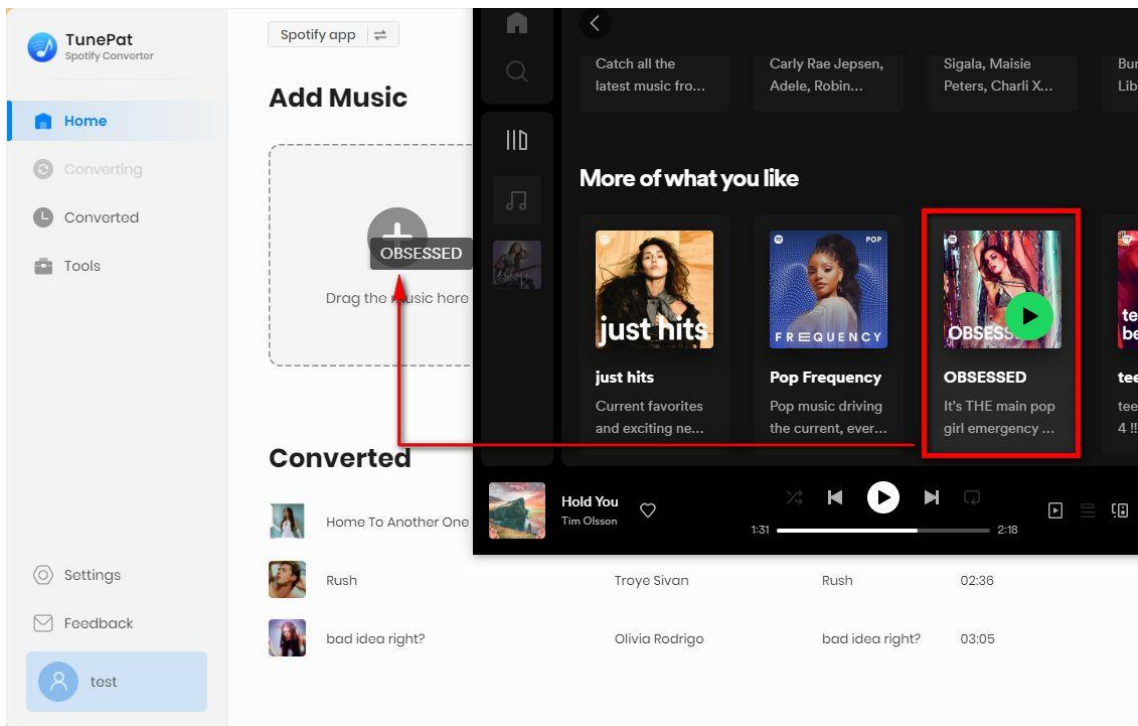

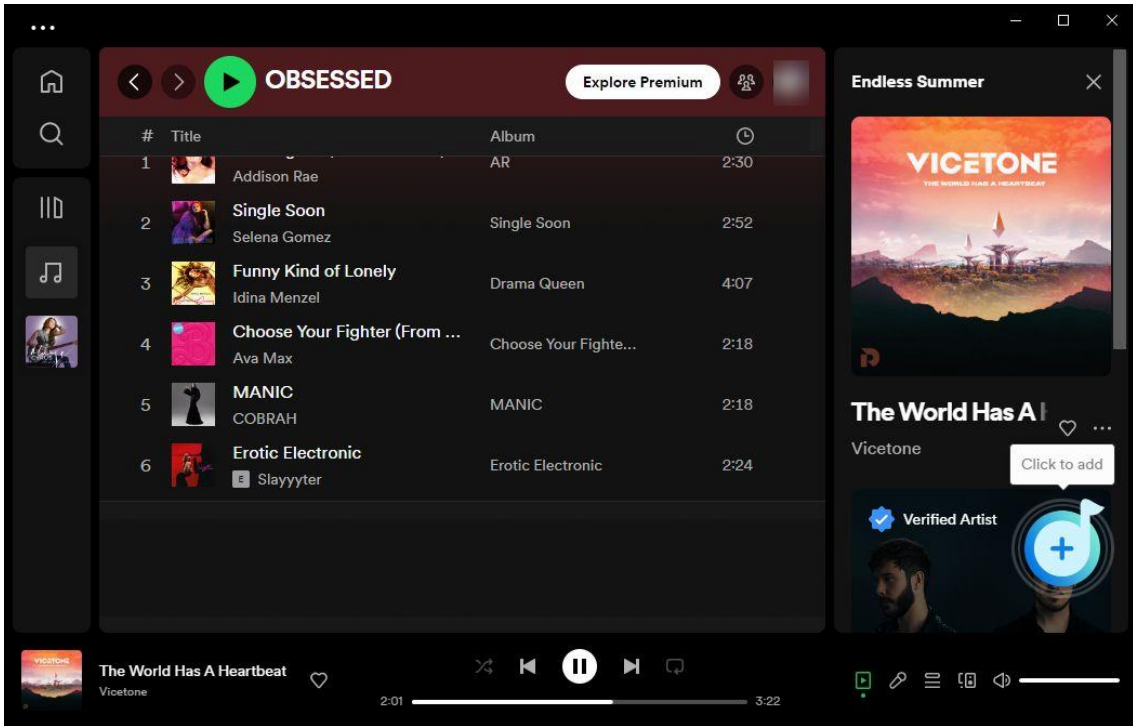

There are three methods you can use:

1. Open what you wish to convert on the Spotify app, and click on the lower right “**Click to add**” button.

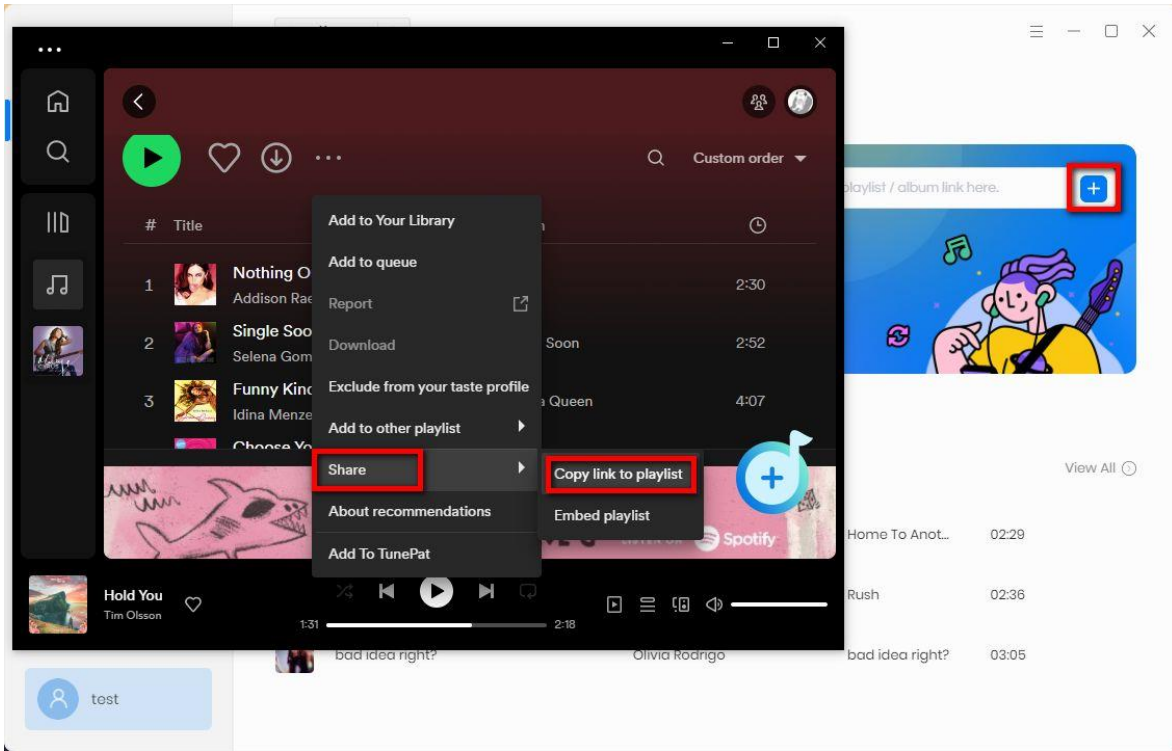

Tutorial of TunePat Spotify Converter for Windows

2. **Drag and drop** the desired content from the Spotify app to the “**Drag the music here**” area on the home page interface (left-hand side).
3. **Copy and paste the content link** into the blue box and click on the “**+**” button for analysis.

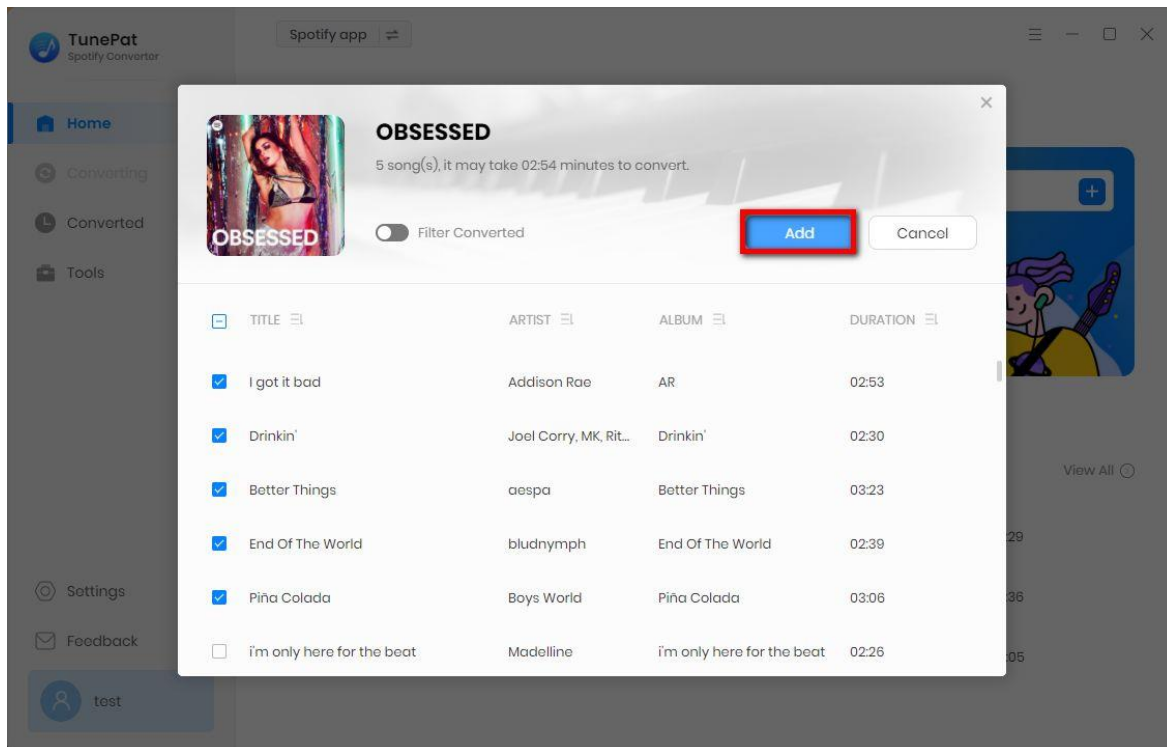

Tutorial of TunePat Spotify Converter for Windows

The analyzed content will appear in a popup window. All items are selected by default, but you can manually uncheck the titles you don't want and then click the **Add** button

Add Spotify Music to TunePat (Web player Mode)

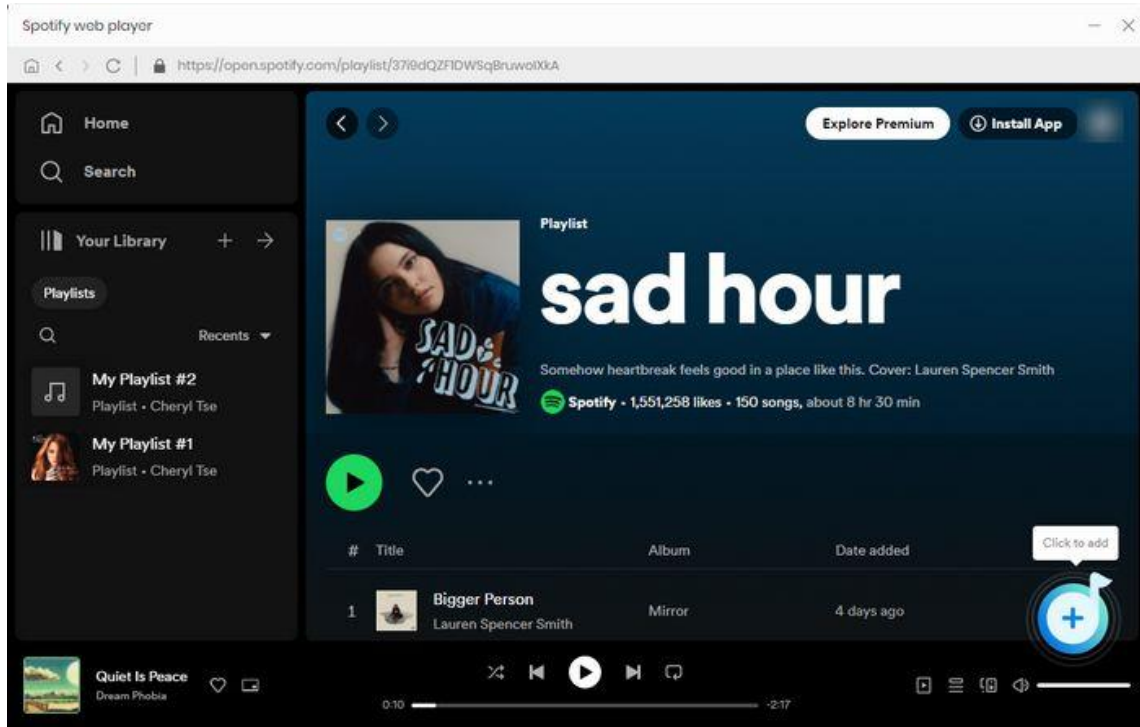

When you choose the **Spotify (Web player)** option (download Spotify Music at **10X** speed), you will see two main pages: the primary interface and the integrated Spotify web player that opens automatically within TunePat. If the web player doesn't appear automatically, you can access it by clicking the **“Open the web player window”** button highlighted in red.

In the Spotify web player windows, you are supposed to click to sign in to your Spotify account. Once you have successfully logged in, you can access Spotify's content. Search for or directly open the Spotify music you want to convert. After clicking the cover to open your target song/album/playlist/podcast, you can see the **“Click to add”** button in the lower right corner. Click this button.

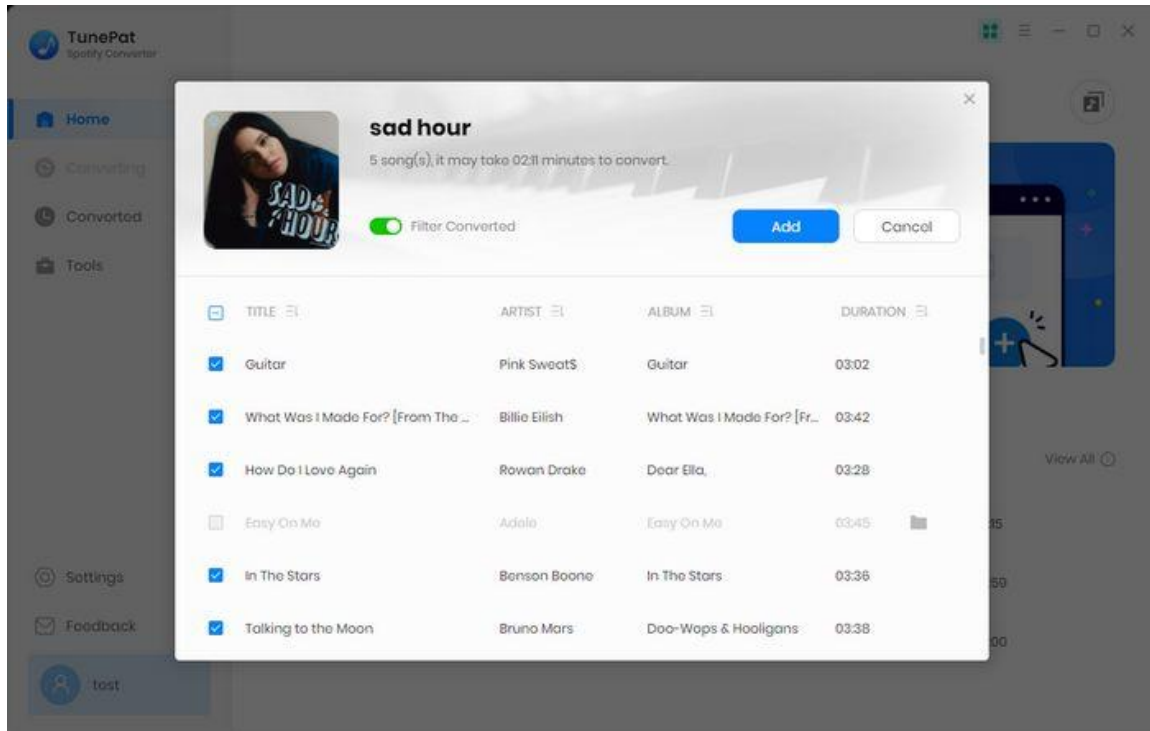

Tutorial of TunePat Spotify Converter for Windows

TunePat will automatically identify the songs on the current page and display them in the pop-up window of the main page. Usually, all titles are selected by default. You can also tick off what you want manually. If needed, you can select manually or click the “**Filter Converted**” button in the upper left corner to filter out songs that already exist in the current local path to avoid duplication.

Click the “**Add**” button to add these songs to TunePat.

Adjust Output Parameter

Before you start converting songs, enter the **Settings** module from the lower left side of the menu bar of the program interface. Here, you can complete the customization of multiple parameters.

Including the following:

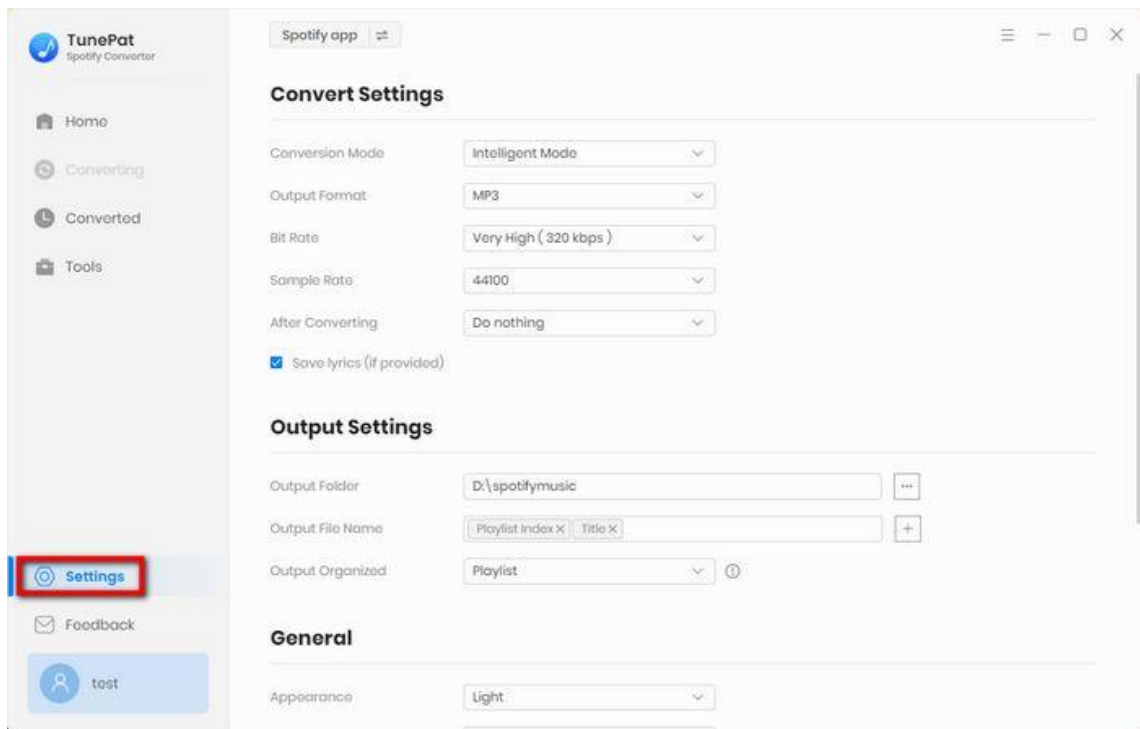

- ↳ **Output Format:** Auto, MP3, AAC, WAV, FLAC, AIFF, ALAC [If you want a faster conversion speed, you can select the AUTO mode in the Output Format column.]
- ↳ **Bit Rate:** 320kbps, 256kbps, 192kbps, 128kbps [You should know that the highest output quality that TunePat can export depends on the actual quality of the original files.]
- ↳ **Sample Rate:** 44.1 kHz, 48 kHz, 96 kHz, 192 kHz [Will vary depending on the selected output format; for example, when you choose MP3, only 44.1 kHz and 48 kHz options are available.]
- ↳ **After Converting:** Do nothing, Open the output folder, Put system to sleep

Tutorial of TunePat Spotify Converter for Windows

- ↳ **Save lyrics (if provided):** After clicking this button, TunePat will automatically recognize, download, and save Spotify song files as **LRC or TXT files**.
- ↳ **Output File Name:** Track Number, Title, Artist, Album, Playlist Index, Year
- ↳ **Output Organized:** None, Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, Playlist/Album
- ↳ **Appearance:** light, dark
- ↳ **Language:** support 26 languages, including Arabic, Portuguese, Czech, Danish, German, Greek, English, Spanish, Finnish, Filipino, French, Hebrew, Hindi, Hungarian, Indonesian, Italian, Japanese, Georgian, Malay, Dutch, Norwegian, Brazilian, Portuguese, Turkish, Simplified Chinese, Traditional Chinese, and Zulu.

After adjusting the settings to your liking, go directly to the **Home** page of TunePat Spotify Converter to convert the selected songs.

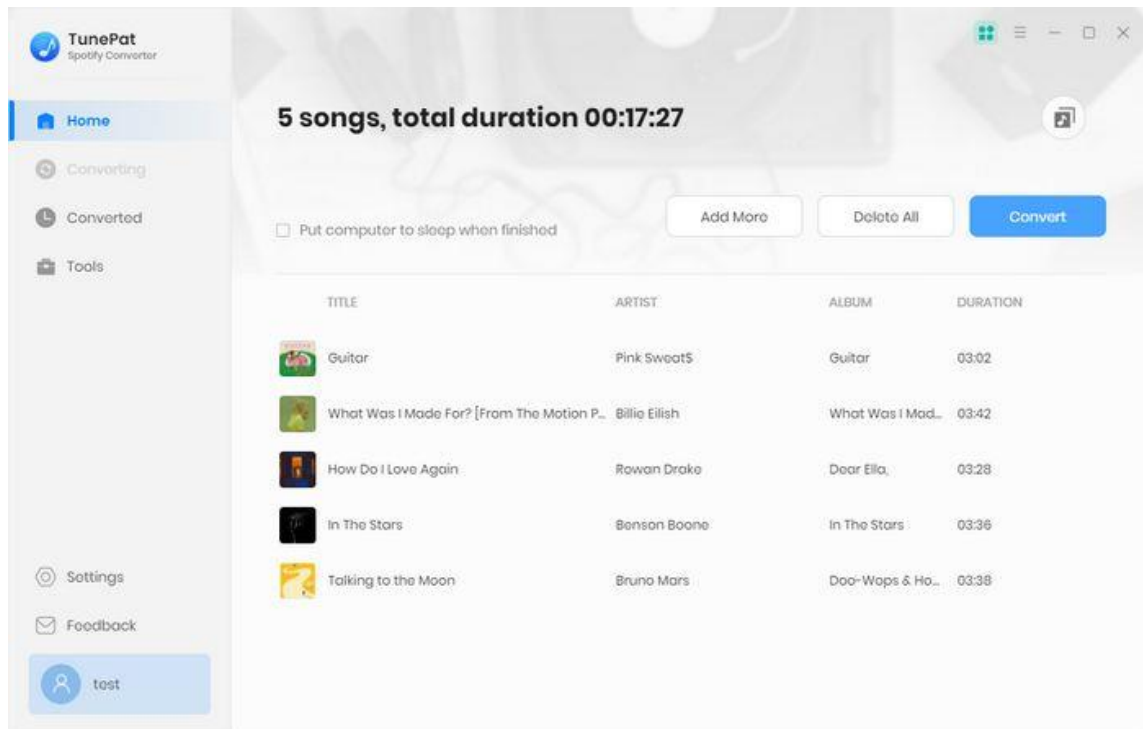

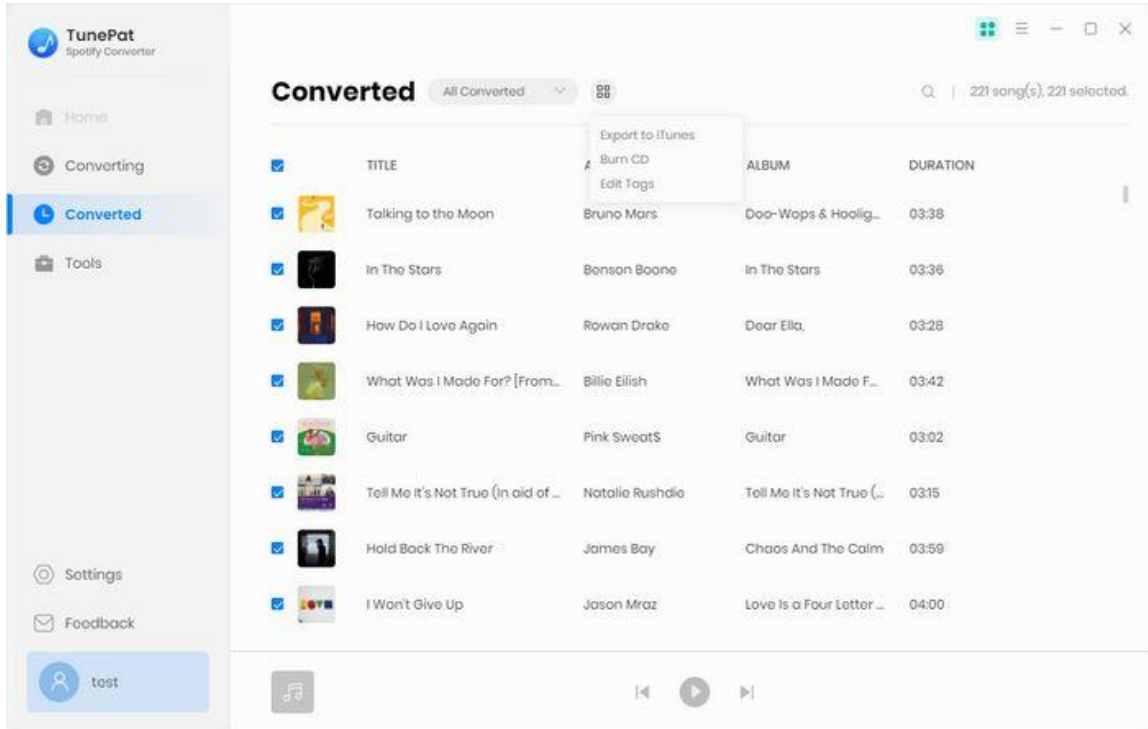

Convert Spotify Music Files

There are three selectable buttons:

1. Select the **Add More** button to continue choosing songs from other playlists or albums.
2. Choose the **Delete All** button and the current list will be cleared with one click.
3. Click the **Convert** button to start the conversion immediately.

After you start the conversion, you can do other things first. After the conversion is complete, you will see a pop-up prompt. After the conversion is complete, you can click the **Converted** option, where you can browse or play the converted titles. You can also transfer them directly to iTunes or burn them to CD, or transfer them to another device you like.

How to Use TunePat Tools

In addition to converting Spotify Music to standard formats, the remarkable TunePat Spotify Converter offers a range of useful tools. You can access the Tools option from the left toolbar. Upon clicking, you will find three sections: Format Converter, Burn CD, and Tag Edit.

Format Converter: This tool is primarily designed for converting audio formats. To begin, click the **+ Add** button to select a local audio file from your computer. Then, click **Convert** to output it to your desired format. Currently, the supported output audio formats include **MP3, M4A, FLAC, WAV, OGG, and AIFF**.

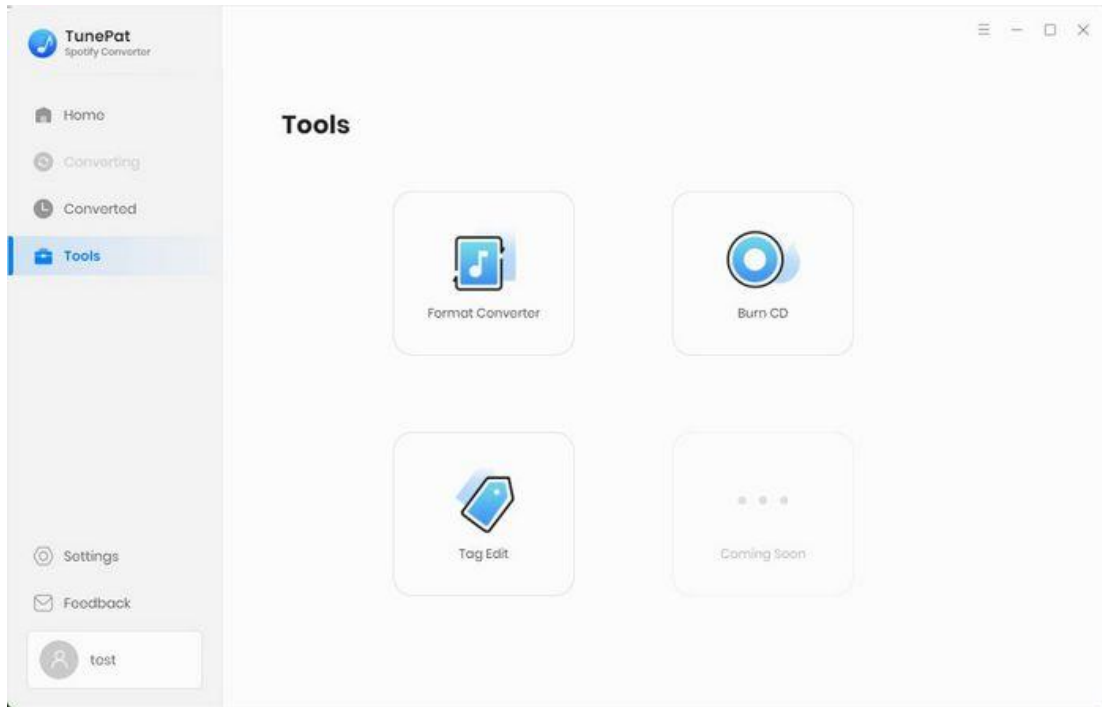

Burn CD: This module provides a convenient solution for users who wish to burn converted songs onto CDs for storage or gifting purposes. By clicking the **+ Add** button, you can import the songs you have just converted into the list. You can name the disc yourself if desired.

Insert a blank disc into your CD or DVD burner, and then click the **Burn** button to initiate the burning process.

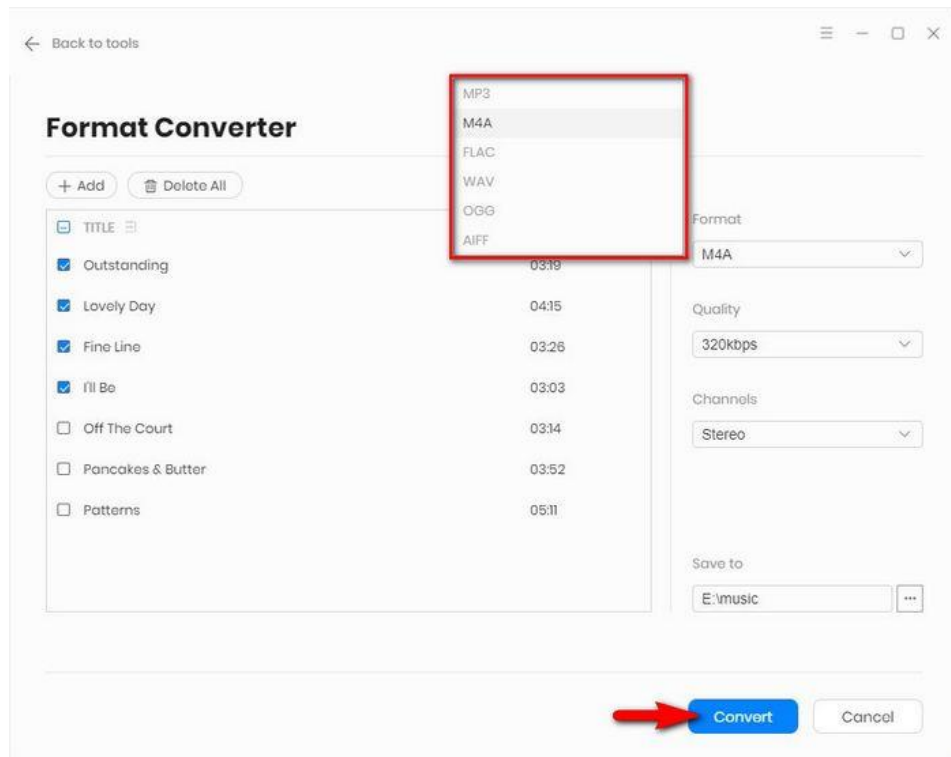

Tutorial of TunePat Spotify Converter for Windows

Tag Edit: In this section, users can modify the tag information of the songs. Once you have made the desired changes, simply click the **Save** button to save the modifications.

Feedback

There is a Feedback option at the bottom of the left menu bar. When you encounter any TunePat related purchase, use, or after-sales questions, you can contact us directly here.

If your program is already registered, the email address on this page will default to the associated email address of your license key. We do not recommend that you modify this email address, because the associated email address can facilitate us to quickly find and locate your order information.

Also, please describe the problem you encountered, and when you encountered a conversion problem, you need to provide the following information when contacting us.

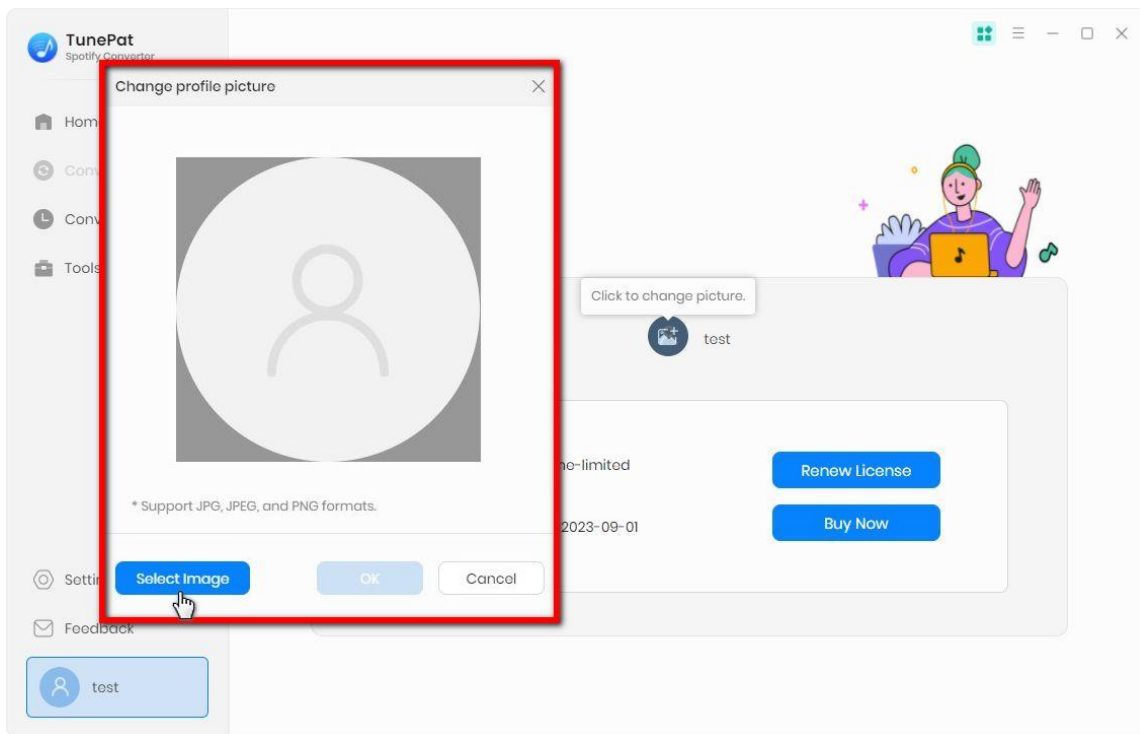

1. Please tell us the details of your computer system.
2. What output format did you choose?
3. Does the problem occur on a specific audio file or all audio files?
4. Please check the **Attach log file** button below. (Generally, the default is the ticked state)

The screenshot shows the 'Feedback' form in the TunePat Spotify Converter application. The left sidebar contains a menu with 'Home', 'Converting', 'Converted', 'Tools', 'Settings', and 'Feedback' (highlighted). Below the menu is a user profile section with a placeholder icon and the name 'test'. The main content area is titled 'Feedback' and contains the following elements:

- A header line: "Leave us a message or contact technical support."
- An "Email address:" label above a text input field containing "tunepatxxx@gmail.com".
- A "Please describe your problem in detail:" label above a large text area containing the placeholder text: "Please provide more details about the problem, so we can solve the problem for you as soon as possible."
- A checked checkbox labeled "Attach log file".
- A blue "Submit" button.

Change Avatar

Click the light blue account button at the bottom left and select the **Click to change picture** button. Tap on the **Select Image** option in the pop-up window to select a favorite picture locally from the computer as the account avatar.
